

AMAZING 2017-2018 School Outing: Rymco and The Little Engineer Join Forces

Dear School Principals.

Greetings.

Are you ready to be part of the most entertaining educational trip of the year?

The Little Engineer (TLE) will offer your students an educational experience that is creatively unforgettable.

So, in collaboration with Rymco, TLE will be organizing the **“Rymco-Little Engineer Automotive Workshop”**, a yearlong outing for your students at Rymco’s Chiyah Showroom which includes 3 hours of **hands-on, minds-on activities**.

Students from ages 10 onwards are welcome to this highly motivational and educational proceeding.

Learners will be exposed to an assembly line demonstrating real life examples of **how cars are put together in automobile factories**.

Pupils will have the opportunity to participate in a **90-min workshop session** where they can **explore the automotive industry** and become informed about the principal systems which constitute a car.

Moreover, students will be introduced to the notion of **preventive maintenance** that also address safety precautions. Also, they will be familiarized with the concepts of **manufacturing, automation, robotics and programming**.

In addition, another 90-min would include an exciting visit to **Rymco’s departments** where learners will gain knowledge on the multi-faceted aspects pertaining to cars which include: **Logistics, sales, marketing and customer relations**.

Come on over and let us empower your students with the educational and constructive opportunity of a lifetime.

25,000 LBP per student. Class capacity: 60 students. From 10 am till 1 pm.

To book a session, please contact: 71 53 04 01

Sincerely Yours, Head of Communications Department, Wissam Stetie
